

Community Follow Up Tool Data Summary

What is the summary data form for the community follow-up tool?

The purpose of this tool is to provide an easy way to keep track of the frequency of responses for each question in the Community Follow Up Tool. The summary will assist the Community Work Improvement Team (WIT) to know what actually happens during the interactions between Community Health Volunteers (CHVs) and household members in their community by bringing together data from the Community Follow Up Tool.

Who completes the Summary data tool?

The Community WIT under the leadership of the Community Health Extension Worker (CHEW) will be responsible for filling out this tool.

When should the Summary data tool be applied?

The tool should be filled out once all the community follow-up interviews (two households per CHV) in a Community Health Unit have been completed.

Community Health Unit:	Sub-County:
From: dd/mm/yy	To: dd/mm/yy
Total Number of reviewed Community Follow-up tools:	

General Questions						
	< 30 mins	30–60 mins	> 1 hour	> 2 hours	Total number responding	
How long were the visits?						
				Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Explanation of visit?						
Confidentiality of visit?						

Kept a record using MOH 514 form?			
A. Activities	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
ANC			
Checked for pregnant women			
I b. Checked how far advanced is the pregnancy?			
Asked about ANC attendance?			
2b. Checked Mother Child booklet?			
Advised on four ANC visits?			
Referred for skilled delivery?			

Post natal care	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Checked for women with newborns?			
B. Post natal care	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Ib. Asked about type of delivery?			
Checked Mother Child booklet for facility delivery?			
Referred home deliveries for Post natal care?			
Immunization	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Checked for children under five years?			
Checked Mother Child booklet for immunizations?			
Referred children to up-date immunization?			

Malnutrition	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Checked whether children under five had been weighed?			
D.Malnutrition	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Used tape to measure arm for all children 6-59 months?			
2b. Referred children for nutrition (arm measurement not okay)			
Communication	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Treated with respect?			
Listened to?			
Advised?			
Understood advice?			

Given chance to ask questions?			
Referral	Number responding YES	Number responding NO	Percentage $Y/(Y+N) \times 100$
Given a form for each referral?			
Understood reason for referral?			
Went to all referrals?			
CHV checked if client went for referral?			

Referral Facility						
Tally of what the community thought about services received at the referral health facility?						
Name of facility	Reason for referral: ANC, skilled delivery, post natal care, immunization, nutrition	Very good	OK	Not so good	Not good at all	Didn't go

Where community members delayed a long time/ did not go for referral list reason?	
Reason given	Number of responses

Comments about CHV visit			
What they Liked	Number of responses	What they disliked	Number of responses
